

Magnetism of Solar Poles

Adur Pastor Yabar (apy.iac@gmail.com)

Manuel Collados Vera

María Jesús Martínez González

March 26th 1st SOLARNET Spring School "Introduction to Solar Physics"

Outline:

- Solar Magnetism
- Data description
- Preliminary results
- Conclusions & future work

SOLAR MAGNETISM

Solar Magnetism

- 22 years solar cycle

Solar Magnetism

- 22 years solar cycle

Hathaway/NASA/MSFC 2013/04

Solar Magnetism

- 22 years solar cycle
- Polarity change shifted on time

Solar Magnetism

- 22 years solar cycle
- Polarity change shifted on time

Solar Magnetism

- 22 years solar cycle
- Polarity change shifted on time
- Two differentiated components
 - Active Regions
 - Quiet Sun -> Poles

Quiet Sun

- **Deeply studied:** Keller et al., 1994; Lin, 1995; Grossmann-Doerth et al., 1996; Sigwarth et al., 1999; Lin & Rimmele, 1999; Sánchez Almeida & Lites, 2000; Socas-Navarro & Sánchez Almeida, 2002; Domínguez Cerdeña et al., 2003; Socas-Navarro et al., 2004; Khomenko et al., 2003; Martínez González et al., 2007
- **Two components:**
 - Network
 - Internetwork

Polar regions

- **Less studied:** Okunev & Kneer, 2004; Blanco Rodríguez et al., 2007; Tsuneta et al., 2008; Ito et al., 2010; Shiota et al., 2012
- **Two components:**
 - Faculae
 - Internetwork

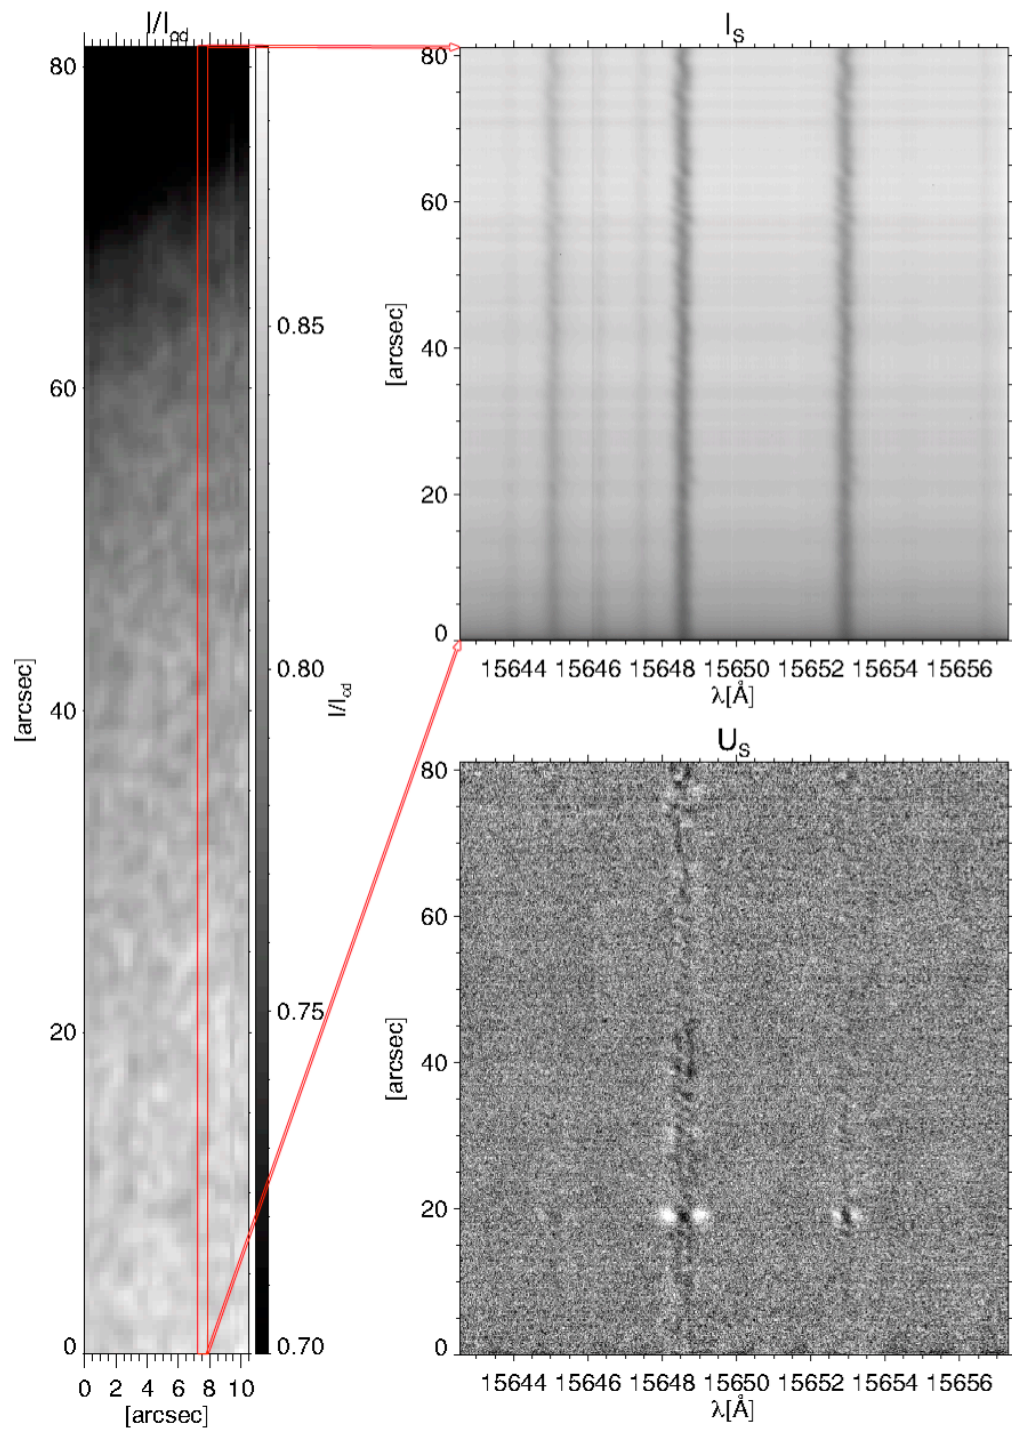

DATA

Data

- Spectropolarimetric data from VTT (TIP) and SST (CRISP)

Data

- Spectropolarimetric data from VTT (TIP) and SST (CRISP)
- VTT:
 - Slit scans
 - FeI 15645Å, 15648Å, 15652Å

Data

- Spectropolarimetric data from VTT and SST
- VTT:
 - Slit scans
 - FeI 15645Å, 15648Å, 15652Å
- SST:
 - Imaging SpectroPolarimeter
 - FeI 6173Å

RESULTS (VTT)

Results

- Original data: Blue 15648Å V Stokes

Results

Results

- Original data: Blue 15750Å V Stokes
- Magnetic field intensity Probability Density Function (PDF)

• •
FM O

Results

- Original data: Blue 15750Å V Stokes
- Magnetic field intensity Probability Density Function (PDF)
- Magnetic flux ($\varphi = \alpha |B| \cos\gamma$) Probability Density Function (PDF)

D M F M O

CONCLUSIONS & FUTURE WORK

Conclusions

- Fields of view full of magnetic signals
- Problems with the inversions
- Previous V Stokes classifications in order to follow different inversion strategies

• Fi

Conclusions

- Fields of view full of magnetic signals
- Problems with the inversions
- Previous V Stokes classifications in order to follow different inversion strategies
- Continue observing (VTT, GREGOR, SST)
- Study low latitude QS in the limbs
- Complement the statistical analysis with particular features analysis
- Bigger Fields of View

THANK YOU!
